## PROFESSIONAL EXPERIENCE

### User Interface Developer

#### eShopWorld

📅 June 2019 – Ongoing

📍 Dublin, IE

*eShopWorld's cloud-based e-commerce platform empowers retailers to scale their online business into new international locations and connect with international shoppers.*

#### My Contribution:

I was Involved into different projects across two agile teams, from an internal booking system application for desks to a customer facing application for pricing manipulation on the retailer e-commerce websites.

#### Technologies Involved:

ANGULAR

WEBPACK

WPA

JASMIN

AZURE

RXJS

### Web Implementation Specialist

#### Cognizant

📅 August 2018 – June 2019

📍 Dublin, IE

*Cognizant is a vendor company outsourcing experts to Google and Facebook, I was selected for the Google Tag Team, a team with more than 50 IT experts working for different countries and languages.*

#### My Contribution:

I was responsible of creating scripts which helped different companies to track the users experience in their websites. I was training and upskilling my team with the latest ES6 syntax and best practices. I developed an internal Chrome extension for the ticket management.

#### Technologies Involved:

JAVASCRIPT

CSS

HTML

PHP

SCSS

COOKIE

GTM

### Front End Developer

#### Outbound

📅 April 2018 – August 2018

📍 Dublin, IE

*Outbound is an AI-based outbound platform for B2B lead generation which helps businesses grow by automating the process of manual prospecting.*

#### My Contribution:

I migrated the front end from an AngularJS application into an Angular2+ one, I was responsible of the definition of the pipeline for the deployment and the development of new critical features like filters in the search and the log in panel.

#### Technologies Involved:

TYPESCRIPT

SASS

GITHUB

REST API

KARMA

GIT

## ACHIEVEMENTS

### Google Hackathon

#### Offline Conversion Tracking

📅 2019

I have been selected along other nine major world Google expert of users web tracking, the goal of the hackathon was to help six clients to track and map users in their website and CRM systems.

### Life Active Learner

#### FreeCodeCamp & TreeHouse

📅 Since 2012

Active member of both communities, collaborating with other students in projects, supporting and being supported from other coders in forums, local meetups and remote meetings on Slack.

### Game Show App

#### www.lucatardito.com/Game-Show-App

📅 2018

Developed a browser version of “Wheel of Success”, a word guessing game where players have to complete a phrase verb.
